AB	Mixts. of a polyolefin contg. a polyolefin grafted with an ethylenic unsatd. carboxylic acid and optionally contg. a metal compd. are useful as adhesives for food packaging films. Thus, 100 parts polypropylene (I) [9003-07-0] was grafted with 100 parts maleic anhydride to give a graft copolymer (II) [25722-45-6]. II 10, I 2.5, Al(OH)3 0.1, and xylene 60 parts were mixed. Al foil-polyester laminate was coated (Al surface) with the mixed compn. and pressed together with I film to give a food packaging film having good heat resistance.
